5-1 Internet Search Engines Introduction

Name: \_\_\_\_\_

Many search engines list only matches that have all the keywords in it. Other search engines will give you all the matches of any or all of the words, listing first the matches that are most relevant. These engines will usually give you a percentage rating. If a search engine gives you a percentage rating, mark the box 'Percentage Rating' with a check.

You will be linking to a number of search engines, entering the following keywords: **meteor crater arizona**. Some search engines may not give you any matches or hits. Others will give you more than you want!

The following is a sample from a web search engine.

**RHP Web found 125553 Web pages for you.**

Total number of pages that match your search criteria.

1. [Geology- Grand Canyon Expedition Company](#)
